Project proposal

Thanks for your time last week. Here is how we would approach the redesign of the **Maison Verdier** online store, based on what we discussed.

Approach

- A two-day discovery workshop with your team.
- A design system built in Figma and shipped as `@verdier/ui`.
- Weekly demos, with a staging link you can share.

> The best time to fix a checkout is before the holiday season.

The full quote is attached; see also our terms.
